All of these demands have been refused by the Missouri Pacific management, but it is believed that at the conference between the chief officials of the order and General Manager Harding a compromise will be effected and a strike avoided.

A vote has been taken by the cfficials of the telegraphiers as to whether a strike should be ordered in event the demand was not granted and it is said that the officials have been vested with the power to order a strike when all measures looking toward a settlement under these terms have proved unavailing.

The officials who have been in conference with President Perham of the Order of Railway Telegraphers are: A. B. Garretson, Order Railway Conductors; P. H. CORN MAKES SLOW GROWTH; WHEAT HARVEST PROGRESSES.

Onfa Crop Heading Short In Missouri -Cotton Growth Checked by Drought-Apples Falling.

Washington, June 21 .- The Weather Bureau's weekly summary of crop conditions is as follows:

continued cool weather in the districts east of the Mississippi aver, especially during the eart of the Mississippi aver, especially during the early part of the week ending June 29, was unfavorable, but to the weekand of the Mississippi the temperature was very favorable, the week averaging the beat of the season in the Northern Rocky Mountain districts.

While high maximum remperatures occurred in California the conditions there have improved sence last week. A large part of the Gulf States and most of New England received little or no rain, and moisture is needed to a greater or less extent in these districts. Portions of the inke region, oble Valley and Tennessee are also beginning to need rain, while too much has fallen in Eastern Kansas and Southeastern Nebraska. Unseasonably low minimum temperature to the 14th and 15th, with light freet in Central New Jersey. CORN.

As a whole, corn has not made rapid growth

As a whole, corn has not made rapid growth in the principal corn States and is generally reported as small, though healthy and well cultivated, except in portions of Nebraska and Kansas, where it is weedy. Good growth, however, is reported from Dahoma and Kansas and the crop continues to do well in the Southern States, though needing rain.

Winter wheat has suffered no untavorable conditions and a general movement is indicated in nearly all districts, although some lodging is reported from Neotraska. Harvest is in progress in the southern portions of Kansas and Missouric but no wheat has been out east of the Missistippi or north of the Oilo River. Harvest will begin this week in Country of the North Facilic Coass winter wheat continues in promising condition, and it is heading in Oregon. APPLIED BY A TEACHER IN A LEADING UNIVERSITY.

Demonstrates the Power of Dr. Wil-lloms' Plak Pills to Restore Vigor to Shuttered Nerves.

llams' Pink Pills to Reatore Vigor to Shattered Nerves.

Mrs. Leander Lane, wife of the minister of the Christian Church of No. 2010 I street, South Omaha, Neb., tells how her for the Christian Church of No. 2010 I street, South Omaha, Neb., tells how her daughter has been enabled to resume her professional work as a teacher after suffering for nearly three years from sovere nervous prostration:

"When she was passing from girihood to womanhood," says Mrs. Lane, "she suffered greatly from difficulties peculiar to her sex. The physician did not help her, but a few boxes of Dr. Williams' Pink Pills brought about the perfect regulation of her system.

"While she had escaped from one grave trouble, she unfortunately began to overwork, first as a student and then as a teacher in a large lown institution for orphan boys. She enjoyed her work and was very enthusiastic, but the strain finally told on her. She became paid, weak nervous, unable to sices; she had no appetite and she suffered from severaheadaches. Then came a complete breakdown and her work had to be given up. "In this emergency we sgain tried Dr. Williams' Pink Pills. Improvement came at first alowly, and we sometimes doubted whether she was gainting, but we noticed that whenever she stopped taking the pills ahs fell back, and whenever she resumed the use of them ahe revived, and so we kept up the treatment until she recovered her usual health and was able to take a position in one of our universities, where she is happily at work. My mother, my daughter and myself bave a well-founded confidence in the merits of Dr. Williams' Pink Pills and are always ready to recommend them."

This is simply one more proof that these pills seek disease at its source and effect fundamental eures. They cure various diseases because these have a common origin in impulred blood or nerves. They put the entire system in a healthy condition, because they introduce vigor that is distributed to every part. They are always and find a road to restoration when the
